Subject: Review of USACE SoW for NRRB IA (FW: Draft WL ITR Scope for 2nd IAG (UNCLASSIFIED))

Jeff, here are my observations/questions on the draft SoW Robyn provided:

- 2.2.1: I don't understand why four ITR reports are proposed when there are six deliverables expected. Are they proposing four ITRs per deliverable (total of 24 ITRs)? Or will some of the ITR reports cover more than one deliverable, and if so, which ones?
- The reviews proposed in Section 2.2.2, 2.2.3 and 2.2.4 go beyond my understanding of the scope of this IA, although the SFS Addendum review in 2.2.2 would be a logical addition to this IA scope if we have the funds to cover it.
- 2.3: While I don't want to tell USACE what they can and cannot review for "familiarity and understanding of the site", I do not see the relevance of the MDNR Radiological Survey Report (May 2013) to the SSFS workplan scopes and wonder why it was included in this SoW.
- 2.4: Number of ITR reports here doesn't appear consistent with 2.2.1.
- 2.5: I don't believe there are any scientific and/or technical aspects of the SSFS workplan dealing with recalculation of costs using a different discount rate. Should review of this deliverable be deleted from the SoW?
- 2.7.2 and 2.7.3: Not sure we can promise this. SSFS-related deliverables from the PRPs have not been following a hard schedule.
- 3.2: These presentations will need to be coordinated/merged with overall EPA/ORD/HQ/USACE presentations on each deliverable, not just a presentation of USACE comments.

Sincerely,
Daniel R. Gravatt, PG

Principles and integrity are expensive, but they are among the very few things worth having.

See attached draft scope for 2nd ITR. USACE requests opportunity to discuss scope and ITR process once you've had a chance to review.

Planning to have draft LOE to you NLT 30 June. Please let me know if you have concerns with this LOE schedule.

Will see you on Monday evening at Drury Inn prior to CAG meeting.

Robyn
